

HP LoadRunner 9.0: Hands on Lab

Page | 1

Overview

This 1 day Hands-on Lab is designed to provide comprehensive understanding of concepts from the Fundamentals of LoadRunner 9.0 and VuGen 9.0 Scripting for Web courses. This Hands-on Lab involves students in building an effective load testing script then running a load test against the Web Tours application to achieve the given performance goals. This activity will validate the newly acquired knowledge on LoadRunner and techniques for load testing Web applications.

Learning Method

100% of the class time is devoted to lab exercises to apply what was learnt in the Fundamentals of LoadRunner and VuGen Scripting for the Web courses. The trainer, a LoadRunner specialist, will be on hand to assist students with any questions they have or guidance they need.

Who will benefit from this course?

- Quality Assurance Engineers
- Performance Engineers
- Users of LoadRunner who need to create scripts and load test Web applications

Pre-Requisites for this course

The Fundamentals of LoadRunner and VuGen Scripting for Web courses.

What you can expect to gain from this course?

Practical experience in load testing including the planning, scripting, execution and analysis stages.

Course Content

100% of the class time is devoted to lab exercises to plan, script, execute and analyze a Load Test.
